TRACK-INSPIRED PROWESS

SRT 392 SHOWN IN DB BLACK

SRT®

392

STRONG BUT NEVER SILENT

From the throaty, aggressive whirl from the HEMI® engine to the rumble from the performance exhaust, Durango SRT 392 delivers an aggressive dose of performance, horsepower and capability. The 6.4L SRT HEMI V8 engine unleashes 475 horses, 470 lb-ft of torque and delivers a 0 – 60-mph drag strip time of 4.4 seconds.¹⁷ Consider the certified 12.9-second 1/4-mile time by the National Hot Rod Association (NHRA), and Durango SRT holds even more bragging rights – and that’s without even going into detail about the 8-speed Performance-tuned transmission, Sport-tuned All-Wheel Drive, high-flow dual exhaust with 102-mm (4-inch) outlets, massive 295 tires on 20 by 10-inch wheels, and huge 6-piston front and 4-piston rear Brembo® brakes.

100% SUV // 100% MUSCLE

// SRT HELLCAT SHOWN IN DESTROYER GREY WITH DUAL GRAPHIC STRIPES IN GUN METAL

SRT HELLCAT®

HP

// DURANGO SRT HELLCAT

This is a big, bold, aggressive muscle car that also happens to be a three-row SUV. There's a 6.2L Supercharged SRT Hellcat V8 engine under the hood, but it's more than just that. We made a powertrain combination that spins higher for more horsepower. We made it feel different and sound different with an X-pipe exhaust and 102-mm (4-inch) outlets. The transmission has been tuned to shift faster much like a muscle car. The suspension is retuned to take advantage of the near-perfect 50/50 weight distribution. With 710 horsepower, a 0 – 60-mph time¹⁷ in the 3.5-second range, a National Hot Rod Association (NHRA)-certified 1/4-mile time of 11.5 seconds and a tow rating of 3,946 kg (8,700 lb), no SUV in the world can tow more or carry more with a faster 1/4-mile time than the Durango SRT Hellcat.¹⁷

INTELLIGENT SYSTEMS FOR BRILLIANT SECURITY

SRT® 392 SHOWN IN WHITE KNUCKLE

PARK-SENSE® REAR PARK ASSIST SYSTEM¹⁶ When your vehicle is in Reverse, this available system can sense nearby objects when moving at low speeds; if an imminent collision is detected, the system will provide a momentary, autonomous brake pulse. In certain circumstances, this system can help bring your vehicle to a stop.

RAIN BRAKE SUPPORT When your windshield wipers have been activated, this standard system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security.

BLIND-SPOT MONITORING (BSM) WITH REAR CROSS-PATH DETECTION¹⁶ With this standard system, radar continually monitors rear vehicle blind-spot zones and will visually and audibly alert you when a vehicle is sensed in any of the zones. When your vehicle is in Reverse, rear sensors warn through a chime if cross traffic approaches the vehicle.

ADAPTIVE CRUISE CONTROL (ACC) WITH STOP¹⁶ This available system helps maintain a driver-selected distance from the vehicle ahead; under certain traffic conditions, the system can bring the vehicle to a full stop without driver intervention.

FORWARD COLLISION WARNING (FCW) WITH ACTIVE BRAKING¹⁶ With this available system, radar and camera technology combine to alert you when the system senses a potential frontal impact. If you're not able to respond quickly enough, the system will automatically engage the brakes with the ability to bring the vehicle to a complete stop.

ELECTRONIC STABILITY CONTROL (ESC)¹⁸ This standard system is designed to assist you in maintaining control of your vehicle during extreme steering manoeuvres. ESC senses when a vehicle is starting to spin (oversteer) or plow (understeer) and attempts to correct the vehicle's course by automatically controlling the throttle and applying the brakes at individual wheels.

READY ALERT BRAKING (RAB) This standard system anticipates situations when you may initiate an emergency brake stop and uses the ESC¹⁸ pump to pre-charge the brake system in order to decrease the time required for full brake application.

ALL-WHEEL DRIVE (AWD) Automatically detects wheel-slip and sends additional power to the wheel(s) with the most traction. Standard on all Durango models.

LANE DEPARTURE WARNING WITH LANE KEEP ASSIST¹⁶ This available system measures your position within lane boundaries. If it detects an unintentional lane drift, it will alert you and can correct the vehicle back into the lane.
