

*Bravo*

It's all about balance: between beauty and function, form and content. Fiat Bravo strikes the balance perfectly, merging classic Italian good looks with pure innovation. Striking lines and design details surround a sporting heart, engineered to provide a mixture of dynamic performance, and class leading safety for all occupants. This is the balance between style and substance, where superb interiors and a wealth of equipment, failsafe protection and inspiring responses are standard. Fiat Bravo appeals to the head and the heart, inside and out. Only compromise is missing.

THE BALANCE  
OF POWER.

Beneath the elegant flow of the Bravo’s bodywork, you’ll find a sophisticated heart: one of its powerful range of engines.

There are two turbodiesels, both 1.9 MultiJet producing 120 and 150 bhp.

The three petrol engines include a 1.4 16v with 90 bhp and two versions of the new 1.4 16v T-Jet, producing 120 or 150 bhp. Whichever option you choose, you will enjoy a balance of performance, economy, reliability and low emissions.

New 5 or 6-speed gearboxes, featuring cutting edge technology deliver light smooth changes, refinement and the durability to handle high engine torque.

In other words, they’re an efficient match for powerful, smooth engines.

## COMPLETELY, BEAUTIFULLY SAFE.

The Bravo leads the way for active and passive safety. It surrounds you with protective measures fine-tuned during thousands of hours of engineering studies, tests and simulations. Intelligent protection comes from the Smart Airbag 2 system, which features adaptive firing perimeters, head protecting window bags and side bags in the seat backs to prevent chest and hip injuries.

The Bravo also features three-point seat belts with pretensioners and load limiters, five headrests and the Fire Prevention System (FPS).

Stopping power is highly advanced, thanks to an ABS system with optional ESP (Electronic Stability Program) and EBD (Electronic Brake Force Distribution).

The ESP monitors vehicle stability continually and keeps you in complete control during sudden manoeuvres.

This technology is also linked to further safety features, such as Hill Holder for secure uphill starts, HBA for enhanced braking performance in emergencies, plus the ASR/MSR antiskid system.

In short, you're getting class beating all-round safety.

## THE FUTURE ACCORDING TO BRAVO

You'll find innovations everywhere in the Bravo, helping you to keep in touch and travel in perfect comfort on each and every journey. Using voice control or the steering wheel mounted controls, the Fiat Blue&Me™ system accommodates Bluetooth mobile phones and MP3, WAV or WMA digital music players, so you can select your

entertainment and keep your hands on the steering wheel. Choosing songs is easy using the clear dash-mounted display. So relax, adjust the dual-zone climate control and let the cruise control, parking, rain and dusk sensors adapt the Bravo effortlessly to conditions outside.
