An optional, fully integrated Trailer Brake Controller (TBC)<sup>1</sup> works with the Anti-lock Brake System (ABS) to balance the truck's braking power with electrically actuated trailer brakes. The TorqShift® automatic transmission includes Tow/Haul Mode to match transmission operation to the demands of towing and hauling. Developed and refined, these advanced factory-installed towing systems help you tow with confidence.

#### REAR VIEW CAMERA

This optional system includes a camera in the tailgate handle bezel and a video display to help ease trailer hookup. Available with rearview mirror display or with 6.5-in. LCD display on the optional Navigation System (shown).

#### TRAILER BRAKE CONTROLLER

A user-friendly display in the instrument cluster message centre indicates output, gain levels and trailer connection status. The system also has a disconnect alarm with message centre warnings.

<sup>1</sup>TBC verified to be compatible with electrically actuated drum brakes only.

# TOW IN CONTROL WITH FORD TECHNOLOGY.

#### STANDARD FRONT TOW HOOKS

This closed-loop design has been tested to 125% of the heaviest GVWR with just one hook.

#### POWERSCOPE™ TRAILER TOW MIRRORS

Designed specifically for Super Duty®, these optional large mirrors adjust, fold and telescope almost 76 mm (3 in.) at the touch of a switch. They include heated glass, integrated turn signals and clearance lamps. The manually adjustable heated spotter mirrors provide expanded visibility. No other mirror in the class offers this much functionality and convenience. Standard on LARIAT, optional on XLT.

## BED EXTENDER (RIGHT)

## BEST-IN-CLASS MAXIMUM PAYLOAD

When a heavy-duty truck can help you load, access and manage cargo better than any other, it only makes sense that it delivers best-in-class payload<sup>1</sup> capability as well.

<sup>1</sup>Class is Full-size Pickups over 8500 lbs. (3855 kg) GVWR.

The Power Stroke® is the most powerful Ford diesel pickup powerplant ever offered, with 100% of its 650 lb.-ft. of torque available at just 2000 rpm.<sup>1</sup> Cutting-edge fuel injection helps deliver optimal fuel efficiency and cold-start capability.

#### FORD CLEAN DIESEL TECHNOLOGY™

This combination of advanced systems helps reduce emissions to levels on par with equivalent gasoline engines.

**Conventional Towing Notes:** This information also applies to models with pickup box delete option (66D). Trailer tongue load weight should be 10-15% of total loaded trailer weight. Make sure that the vehicle payload (reduced by option weight) will accommodate trailer tongue load weight and the weight of passengers and cargo added to the towing vehicle. The addition of trailer tongue load weight, and the weight of passengers and cargo, cannot cause vehicle weights to exceed the rear GAWR (Gross Axle Weight Rating) or GVWR (Gross Vehicle Weight Rating). These ratings can be found on the vehicle Safety Compliance Certification Label. For F-250/F-350 SRW models, F-250 trailer weights are shown; F-350 trailer weights are within 91 kg (200 lbs.). Check with your sales consultant.
