

GENESIS ELECTRIFIED GV70

Overseas model shown, Australian specifications may vary. Electrified GV70 in Uyuni White.

INTRODUCING THE ELECTRIFIED GENESIS GV70

Rightfully sitting at the top of the GV70 range, Genesis' fully electric, mid-size SUV represents the perfect balance between luxury, performance, athletic beauty and state-of-the-art technology — delivering on its premium promise like no other in its class.

At the heart of everything the Electrified GV70 does is you, the driver; whether that's providing ultra-fast charging to make your life more convenient, or offering a suite of advanced safety assist systems to ensure peace of mind on the road.

And if it's a sustainable yet dynamic driving experience that you seek — from the comfort of a premium cabin, of course — look no further. In combination with Genesis' bespoke EV platform, the GV70's next-generation electric motors combine to produce spectacular all-wheel-drive performance.

Refinement, innovation, excitement... the Electrified GV70 triumphs on every front, a vehicle that will charm and surprise in equal measure.

DYNAMIC DESIGN

Bringing Genesis' 'Athletic Elegance' design ethos to life in startling fashion, the Electrified GV70 is a show-stopping piece of styling.

Its dynamic character is laid bare from every vantage point. Front-on, the Genesis 'Crest' grille, with a unique inverted 'G-Matrix' pattern, lays down a striking marker. From the side angle, the distinctive 'Parabolic Line' and integrated tailgate spoiler hint strongly to the vehicle's sporty intentions. Wander to the rear and be drawn to the signature LED 'quad lamps' — one of many design details that underline the GV70's unique character.

Open the doors and step into a special place, a cabin designed to capture the 'Beauty of White Space', a concept inspired by Korean architecture. As such, the interior is open and beautifully uncluttered, its elliptical shapes and simple forms taking their cues from airplane wings and fuselages. Of course, luxurious flourishes abound too, from full-grain Nappa leather seats to premium finishes and detailing using materials such as fine-brushed aluminium, stainless steel and sustainably sourced suede.

And with a cockpit layout that's firmly driver focussed, you're sure to be captivated by the level of comfort and refinement the Electrified GV70 bestows on both pilots and passengers.

POWER & PERFORMANCE

Driving dynamics, **sustainable performance**, luxury, a few thrills thrown in for good measure — the Electrified GV70 is a vehicle that offers a full buffet of stirring driving experiences. Making the magic happen are two high-output permanent synchronous motors, powered by a 77.4kW lithium-ion battery. Together they generate 360kW and a spectacular instant torque figure of 700Nm, enough to see the GV70 accelerate from 0-100km/h in a mere 4.2 seconds when the addictive ‘Boost Mode’ function is engaged.

Rest assured, though, no ride in the GV70 will ever be brutish. Active Road Noise Control (ANC-R) technology reduces road noise with its use of sound-absorbing materials, while the electronically controlled suspension, in conjunction with a front camera and navigation data, adjusts up to 100 times per second to ensure a smooth, comfortable journey.

And naturally, you'll want these travels to be as long and pleasurable as possible. That's why Genesis offers speedy charging when connected to a 350kW* fast DC charging station (from 10%-80% in 18 minutes) or convenient AC charging at home or the office (from 10%-100% in a little under 12 hours). Once fully charged, the GV70 is ready for an all-electric range of up to 445km.**

*Charging times based on using a 350kw fast charger. Charging times may differ and depend on charger specifications and conditions.
**Range estimates are based on WLTP (Worldwide Harmonised Light Vehicle Test Procedure). Figures stated for comparison amongst electric vehicles tested to the same standard.
Actual vehicle range will differ depending on vehicle configuration, battery age and condition, driving style and operating, environmental and climate conditions.
