

GENESIS
ELECTRIFIED G80

THE GENESIS G80

Genesis has travelled beyond creating new standards for premium luxury vehicles and is progressing towards a sustainable future with the unveiling of their new electrified range. From captivating exterior design, sophisticated driving capabilities, to class-leading safety and control. The G80 is luxury driving uncompromised. Lead the way to preserving the environment in supreme style and comfort.

ELECTRIC LUXURY STARTS NOW

The G80 sets new standards for performance and technology in a luxury electric sedan.

Dark leather/grey/grey/grey/black two-tone
(full package including glacier white seats, dark grey/grey/grey upper door trim, signature design selection (furniture wood)).
Overseas model shown.

With the full package including all options.

EXTERIOR DESIGN

The G80's aerodynamic G-Matrix patterned crest grille and hidden charging door on the front demonstrate the sustainable future that lays ahead of the Genesis brand. Exclusive eco-friendly materials with a refined design show off the sustainable luxury for which Genesis strives. The design eliminates the exhaust tips at the back and places the bumper for aerodynamics.

Matira blue (full package including solar roof).

INTERIOR DESIGN

Genesis G80 embraces the brand's unique Beauty of White Space interior and applies a combination of two new colours, Dark Lagoon Green and Glacier White, to achieve a visual tranquility befitting a quiet electric vehicle. Nappa leather seats using natural dyes and eco-friendly, forged wood garnishes offer a glimpse of sustainable luxury Genesis seeks.

• Eco-friendly leather using all-natural dye is only available in the signature design selection's Nappa leather (standard design offers natural leather).

• Forged wood is eco-friendly, recycled wood made from leftover pieces of wood produced during the furniture manufacturing process. Due to this characteristic, wood grain patterns may be inconsistent, while small spots and/or natural cracks may occur.

Eco-friendly fabric made from recycled PET has been applied to the headliners and cargo space, while fabric made from recycled nylon have been applied to the floor.

Dark lagoon green/glacier white two-tone
(full package including glacier white seats, dark lagoon green upper door trim / signature design selection (forged wood)).
Overseas model shown.

REFINED DYNAMISM

Genesis G80 features exclusive electric vehicle technology, delivering a premiere driving experience. With an advanced rapid charging system and impressive driving range, long distance travel is a breeze as it is comfortable, along with performance and safety credentials specifically designed for large electric sedans.
