

THE NEW GENESIS G70

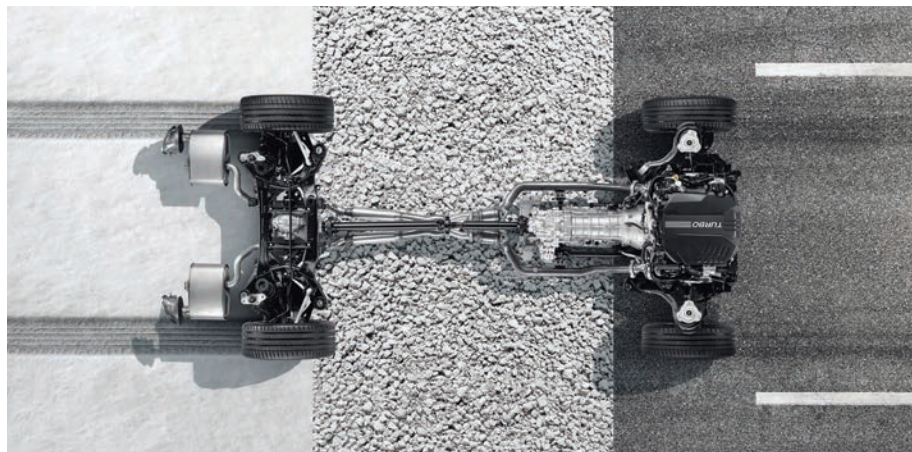

REDESIGNED. REINSPIRED.

Building on the early success of its predecessor, the new G70 sets out to make every drive more memorable with a new, more aggressive front end, sharpened silhouette and a progressive rear. Inside, the focus is placed on connecting you and the car. A larger 10.25" HD display puts key information front and centre, sport seats hold you firmly in place, and a new, available dual mode sport exhaust gives you more power and emits an intoxicating sound as you get the most out of G70.

DRIVING DYNAMICS

01 ALL-WHEEL DRIVE

The standard All-Wheel Drive system automatically senses slippery or unstable driving conditions that even the driver may not detect and proactively balances power between the front and rear wheels to ensure optimal stability at all times.

02 ELECTRONICALLY CONTROLLED SUSPENSION

Depending on the drive mode selected by the driver, this function adjusts the damping levels of the shock absorber. Comfort offers stability befitting a luxury sedan, Sport provides a dynamic and reliable ride, and Sport+ offers seamless unity with the road surface.

Available on 3.3T Sport models only.

03 BREMBO® BRAKES

The available high-performance Brembo® brakes are applied to secure the G70's superior driving performance and differentiated image as a sports sedan.

Available on 3.3T Sport models only.

04 VARIABLE VALVE EXHAUST SYSTEM

The G70's exhaust sound can vary depending on the drive mode (Smart, Eco, Comfort, Sport, Sport+, or Custom) selected by the driver. The sound is aligned with the accelerator's opening of the throttle, creating an exhaust note that best matches the driver's performance preference. Sport+ mode can also provide an extra 3hp when selected.

Available on 3.3T Sport models only.

05 8-SPEED AUTOMATIC TRANSMISSION / SHIFT-BY-WIRE (SBW)

The 2nd-generation, rear-wheel 8-speed electronic automatic transmission achieves optimal efficiency, rendering a sophisticated response and smooth transmission. The electronic shift-by-wire lever is light and compact, and a cushioned finish on the top of the knob offers a luxurious grip.

06 8-AIRBAG SYSTEM

A total of 8 airbags are installed, including a new centre-side airbag situated between the front occupants to mitigate impact with each other or with interior materials in the event of a collision.

TECHNOLOGY & CONVENIENCE

**01 10.25" HD TOUCH-SCREEN
WITH NAVIGATION SYSTEM**

The new 10.25" wide high-definition touchscreen display can be split to show media, weather and GPS information separately and features a new graphical user interface (GUI) designed exclusively for Genesis.

02 HEAD-UP DISPLAY

With the available Head-Up Display, key vehicle information, including driving speed, GPS information, and advanced driver-assisting information, is projected on the front windshield with optimized brightness for both day and night.

**03 15-SPEAKER LEXICON®
PREMIUM AUDIO SYSTEM**

The available 15-speaker Lexicon® premium audio system with the latest Quantum Logic surround sound technology are optimally positioned for the best acoustic performance. Real stainless steel midrange speaker grilles reproduce a clear voice range that is close to the original sound, while subwoofers installed beneath the driver's seat and front passenger seat provide an immersive listening experience.

**04 SURROUND VIEW
MONITOR (SVM)**

The available Surround View Monitor uses cameras mounted around the vehicle to show diverse images of the vehicle's surroundings, including 3D, 360-degree images from any point of your vehicle, to assist with parking.

**05 BLIND-SPOT COLLISION-
AVOIDANCE ASSIST (BCA)**

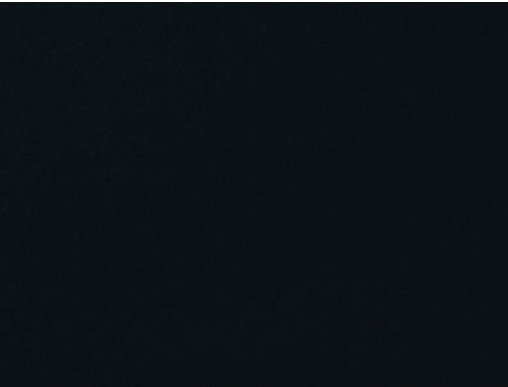

If a risk of collision with a vehicle at the rear is detected while changing lanes, the BCA system warns and assists braking if necessary to avoid a collision. It also detects the risk of collision with vehicles approaching from the rear side when leaving a parallel-parked position and automatically assists in braking.

06 BLIND-SPOT VIEW MONITOR (BVM)

When the turn signals are activated to change lanes, video images on the centre cluster show larger areas of the respective side/rear of the vehicle than the side-view mirrors to assist safe driving.
