

“Be different and experience the distinctive Vencer Sarthe, built by a passionate team who went the extra mile. To make the Vencer Sarthe “yours” you can personalize the Sarthe in many ways. Join the Victory by owning a Vencer Sarthe”.

Passion and love for cars has created quite a few iconic cars in the past. Vencer intends to share and capitalize upon this passion, love and knowledge. To do this, we launched the Vencer Community. Around the world contestants can contribute ideas on design, knowledge, opinions and experiences.

Vencer therefore pushes its limits on a groundbreaking manner in the development of the Sarthe's successor.

So, feel the Victory and join us.

At the end of 2010 Robert Cobben laid the foundation for the design and from that point ideas grew to reality by starting up Vencer*. Driven by those who said it couldn't be done, the Vencer Team continued to work on their dream with clear conviction. A sports car developed with a vision and with superior expertise by skilled engineers who have contributed their opinion and enthusiasm.

**We proudly present:
the Vencer Sarthe.**

Kind regards,

Robert Cobben
CEO & Founder

*Vencer means to win/overcome.

Vencer **standard** equipment

Vencer interior

The **Vencer Sarthe's interior** is handcrafted with using the finest materials. Black leather with grey stitching combined with a black finished mid-console is standard. Many add-ons are possible to personalize the interior.

Optional:

- Different collared stitching
- Mid-console in Carbon finish (natural, silver or black)
- Gold finished details.
- Personal colored leather/alcantara

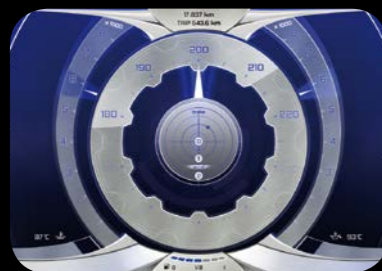

Vencer cockpit

The CIS* is positioned in the center of the interior.

With all info directly available on this position, driver becomes one with the car and the road.

The CIS can be personalized by each customer.

* CIS (Central Info System) is specially developed in collaboration with ID4motion.

Vencer cockpit

The information on the CIS* displayed are:

- Tri-rotate high accurate Speedometer
- Bi-REV counter
- Longitudinally and transversely G-force meter
- Clock
- Coolant and oil temperature
- Day and night view (automatic)
- Light, battery and fuel indication
