## INTRODUCING THE 2016 SPECIAL EDITIONS

A host of extraordinary features make these vehicles anything but standard issue. Boasting unique exterior styling elements and distinctive alloy wheels, the Volvo S60 and XC60 Special Editions are guaranteed to stand out.

### BLIND SPOT INFORMATION SYSTEM (BLIS)

Volvo has always been a pioneer in safety. We invented the very first Blind Spot Information System, and we have continued to innovate with our newest BLIS package. Using radar, Volvo's new BLIS system detects oncoming traffic from a further distance than previous systems, giving you additional warning time. Unlike camera-based systems, our radar-based system remains fully functional even in bad weather, helping you navigate the road when you need it most.

### ADAPTIVE CRUISE CONTROL

Choosing a Volvo means never having to choose between comfort and safety. Adaptive Cruise Control automatically adjusts your cruising speed to maintain a safe gap between your Volvo and the vehicle ahead, resuming its set cruising speed when traffic allows. This lets you enjoy the comfort and economy of cruise control, while eliminating the distraction of manually adjusting your cruising speed. Supporting slow and fast cruising speeds in all densities of traffic, it's the closest thing to your car driving itself.

## PEDESTRIAN AND CYCLIST DETECTION

We don't just want to build the safest cars. We want to create the safest roads. In another world-first for automotive safety, multiple sensors work together to identify pedestrians and cyclists in front of your Volvo, automatically applying the brakes if the system senses a collision. With half of all fatal pedestrian and cyclist accidents occurring at speeds of less than 25 km/h, our new technology minimizes the risk of potentially fatal accidents, and significantly reduces the impact of accidents that are unavoidable.

## LANE DEPARTURE WARNING

A car is only as safe as its driver. So we wanted to help our drivers be safer too. Lane Departure Warning System actively monitors the road and sounds an alarm when your Volvo makes an unintended lane change. By alerting you when your Volvo crosses a lane marker without a lane change indication, the Lane Departure Warning System helps you maintain alertness and ensure you're putting your best foot forward whenever you put it on the pedal.

## INTELLISAFE

Since 1927, we have been committed to building the safest cars on the road. IntelliSafe goes beyond that. It is our complete approach to safety innovation, incorporating a wide range of technologies to protect you and those around you, such as City Safety Auto-Braking, Pedestrian and Cyclist Detection, and Blind Spot Information System.
