

INTRODUCING THE ALL-NEW
VOLVO V90

The Volvo wagon is a motoring icon.

But with the new V90, it's more beautiful than ever.

MADE FOR A NEW WORLD.

The All-New V90 combines stunning Scandinavian design with intuitive technology.

The all-new Volvo V90 builds on Volvo Cars' indisputable heritage in the estate segment which began over 60 years ago. However, where its predecessors have been functional, safe and premium, the all-new Volvo V90 evolves by redefining the luxury estate from the inside out.

Volvo's all-new V90 offers sophisticated elegance with versatility for the whole family. Its great proportions, intuitive technology and stylish interior combined with a refined driving experience makes the V90 an obvious choice in the luxury estate segment. The all-new Volvo V90 represents the quintessential Swedish luxury estate.

V90 T6 AWD Inscription, 711 Bright Silver metallic,
20" 8-Spoke Silver/Diamond Cut Alloy Wheel

Panoramic Sunroof Standard. Perfect for stargazing, the standard panoramic roof connects you to the world outside. When the shade cover is retracted, the power operated panoramic roof illuminates the cabin, highlighting the natural character of the leather seats and warm interior.

2017 Volvo V90 T6 All AWD Inscription in White Pearl with, 19" 10-Spoke Silver Diamond Cut Wheels, Colour coordinated lower body mouldings with Silk metal side window trim and door mirror housings.

Sophisticated Elegance.

The All-New Volvo V90 is available in three distinct trim levels: Momentum, R-Design and Inscription, each offering a unique expression of this motoring icon.

LED Headlights. The face of the vehicle is distinguished by Thor's Hammer: The T-shaped headlights, inspired by the Scandinavian Norse God. Active high beam LED headlights with Automatic Bending Lights, bends 30 degrees in both directions to provide greater visibility, and are standard equipment on both R-Design and Inscription trim levels.

LED Tail Lights. A signature of Volvo's iconic design provides increased visibility while emphasizing the body shoulder line of the vehicle.

Colour coordinated lower body mouldings. A premium touch that unifies the side profile while complimenting the overall sophistication. For added elegance and exclusivity, the Inscription trim level offers a high gloss chrome accent strip below the door sill with Inscription markings.

Trunk Lid Comfort Opening. With the Keyless locking/unlocking option, the trunk lid has a comfort opening and closing function activated by moving a foot beneath the left side of the rear bumper.

This image includes some colours and trims not available in Canada, ask your Volvo Retailer for details.

Beautiful materials, advanced technology.

The design and craftsmanship of the cabin are the Swedish vision of luxury, innovation and technology, designed with the driver in mind.

Touchscreen Sensus Display. The centre console display is an example of genuine Scandinavian design, with form and function combined. The 9-inch touchscreen Sensus display is our answer to overly complicated infotainment and entertainment systems that puts control at your fingertips. Using highly advanced Light Control Film means the finger barely needs to touch the screen, and it can sense a finger, even if it is gloved.

Premium Sound by Bowers & Wilkins. Premium Sound by Bowers & Wilkins embodies our quest for perfection, elevating the sound experience by putting you at the heart of the music. Equipped with 19 speakers, you have the opportunity to select your own sound experience and choose from Studio, Individual and Gothenburg Concert Hall sound modes.

Graphical Head-Up display. The Head-Up display offers text and graphical information highlighting road sign, vehicle speed and navigation information.

Driver Display. Engaged by ignition, the high resolution Driver Display provides the driver with everything needed to drive and navigate safely. Display brightness is based on the ambient light within the cabin which will automatically adjust for sunshine or the headlights of a trailing vehicle. Two Driver Displays are available: the 12.3" variant as shown above and the smaller 8" with one large instrument in the centre.

Safety.

We've simplified the driving experience, making it easier and safer for you to go wherever your road takes you. Sit back and enjoy the drive.

IntelliSafe. The V90 features a very high level of safety, both protective and preventive. We call this approach IntelliSafe, which includes an entire suite of intuitive technologies. This is made possible because the Volvo V90 has a huge capacity to process a vast amount of information about its own trajectory and that of other cars around it. That means it can predict imminent collisions, warn the driver of such danger and finally, intervene to mitigate or avoid collisions entirely.

City Safety. City Safety is at the heart of IntelliSafe, and is equipped with several standard safety features including Lane Departure Warning, Blind Spot Information System, Frontal Collision Warning and Pedestrian and Cyclist Detection, among many others.

City Safety in the Country. In the Volvo V90, our comprehensive collision avoidance package, City Safety, also includes detection of large animals, like moose/elk, deer, horses and cows – another Volvo world-first. The standard-fitted radar/camera unit can detect large animals standing on the road or slowly moving across it with the side towards the vehicle. If a large animal is detected, the Volvo V90 warns the driver and brakes automatically, if the driver does not. In this way collisions with large animals can be avoided or mitigated.

Pilot Assist – Gen 2. A world-first in standard safety equipment, Volvo's Pilot Assist II technology is a semi-autonomous function that builds on Pilot Assist I. Pilot Assist II maintains a set speed and distance from surrounding vehicles on public roads and is intended to combat monotonous highway driving. The vehicle assists the driver with gentle steering inputs to help keep the vehicle stay centered in the lane; unlike Pilot Assist I the vehicle no longer needs a lead car to operate. The hands-on semi-autonomous Pilot Assist steering support is active up to speeds of 130km/h.

Light. Space. Elegance.

Scandinavian design comes to life in a spacious, light-filled cabin. A place where luxury meets versatility to make life easier.

Front and Rear Seating. In order to make the backrests as slim as possible and increase legroom in the second row, a completely new frame and specially designed back was developed for this generation of Volvo seats. In the rear, a centre armrest with two cup holders covered by a lid, integrated in the backrest of the rear seat, is included in all available upholsteries. Additional comfort and convenience can be added with optional features like heated rear seats or 4-zone electronic climate control.

Seats. Seating comfort is traditionally one of the highest priority areas for Volvo and an essential part of our Designed Around You philosophy. Our seats have been considered to be among the best on the market for decades. Even so, we designed all-new seats for the new generation of Volvo cars to further elevate the driving experience.

Rear Folding Seats. The space and utility to compliment an active explorer. The V90 will take you where you want to go. The 40/20/40 rear seat split allows you to carry everything you need.

Luggage Net. There are many Volvo Accessories available for the V90, like this handy elastic net. Attached to the car's load-lashing loops, the net is installed flat on the floor and ready for action when you are. Ask your Volvo Retailer for the complete list of Volvo Accessories.

Three levels of sophistication.

The All-New Volvo V90 is available in three distinct trim levels:

Momentum

Grille

Bright frame with centre in piano black. "Waterfall" design.

R-Design
