

HONDA
The Power of Dreams

INTRODUCING THE NEW JAZZ.
PLAYTIME'S BACK.

• PLAY AGAIN

A long time back, perhaps too long for memory to remember, we used to do something called play. We used to play with anything we found. The rattle. The dog's tail. The bat and ball. Paper. The GI-Joe's. We hated school. We loved playtime. Because that was the time when we could be ourselves. We could get away with anything. Imagination was our boundary.

As we grew up, we became mature and responsible. We turned into this boring person called an adult. We stopped imagining. We stopped exploring. But most importantly, we stopped playing.

The new Honda Jazz with its exciting add-ons ensures you start playing again. Flip over and discover what we've added to the playful car.

New
Jazz

PLAY WITH ALL THE NEW FRILLS AND THRILLS

USB Port.
Because music is a
personal thing.

Silver + Matt
colored headlight.
So it looks as good
as it drives

Reclining rear seats.
For super comfort during those long trips.

Gives it a smooth sporty feel.

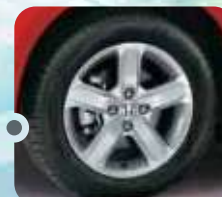

Premium Blue Black Interior
and reclining rear seats.
For luxurious comfort
during those long trips.

Electrically Retractable
Outside Rear View Mirror.
Get used to things getting
done for you.

Fog Lamps.
For early mornings
and those late night
winter dates.

Sporty Alloy Wheels.
So you can drive around in style.

Aerodynamic bumper
& fender (front & back).
For that all round sporty look.

● **JAZZ X**

• PLAY AROUND

Take life a little less seriously. Forget the deadlines every once in a while. Loosen that tie wrapped tightly around your neck. Breathe. Smile. And play.

The new Jazz is all about super power. It's about brilliant aerodynamics. And about looking good. Simply put, it's a car that lets you play.

1.2L i-VTEC engine especially designed for India

Agile and responsive to drive

So smooth and cushioned a ride
that you won't feel a thing

Front and rear suspension

PLAY WITH FORCE •

Bring playtime back with Jazz's i-VTEC engine. It's designed to give you just the right mix of awesome power and fuel efficiency.

What i-VTEC does is regulate the opening of the air-fuel intake valves and exhaust valves according to the engine's speed. By doing this, not only does it result in both superior power, but also significantly low fuel consumption.

The Jazz also has a Drive by Wire system so you have a combination that responds at the touch of a throttle. The five speed manual transmission ensures a balance between sporty driving and fuel efficiency.

MAXIMUM POWER

90 PS/ 6200rpm

MAXIMUM TORQUE

110 Nm/4800rpm

Large vent window and spacious window graphics

Super - forwarding form

• PLAY THE PILOT

As kids, all of us wanted to be pilots. Because after all, there is nothing better than flying around in the sky. Completely free. Uninhibited. And carefree. That is exactly what the Jazz with its Super-forward Cabin and Dynamic Forward Leaning form allows you to do. Not to mention, it gives you better mileage too. But don't take our word for it. Get behind the wheel and see for yourself how the Jazz spends minimum effort cutting through the air. So, how does it feel to fly?

PLAY WITH SPACE

Remember that room you had as a kid? And you had all the things that you loved inside it? Your bed, your computer, your entire GI-Joe collection, your comic books.

The new Honda Jazz is a bit like your room when it comes to space. It's cabin space is big. Bigger than any 'small' car. And even bigger than some entry level sedans.

Which really means that once again, you can have all that you love inside your Jazz. And there'll still be space left inside for more.

HONDA

Spacious and low height boot with extra storage space

• PLAY WITH YOUR WORLD

The Jazz is full of little compartments and boxes. There's a utility box under the rear seat. There are cup holders at every door pocket, should you like a coffee on the move. The low height boot lets you load your luggage with complete ease and the rear seats have a ratio of 60:40. So you can choose your seating arrangement.

Upper and lower glove box. One for work and one for play.

Cup holder in front of AC vent. Strategically placed so you can cool your drink.

Front door pocket. So you can keep all that you love within your reach.

Box under rear seat. It's your own little treasure trove.

• PLAY MAGIC

One cannot play in small spaces. You need openness. And you need flexibility. The Jazz gives you the freedom to choose what kind of space you like. With the aptly named Magic Seats, you can mould the interiors to your liking in three different modes – Tall, Utility and Long. So go ahead. Make your space. Make your own playground.

UTILITY MODE - Toss in a cycle. Or the basketball. It's picnic time.

LONG MODE - There's room in there for a whole band and the lead singer's ego too

TALL MODE
Transporting your entire golf set. If you need to.

● Beige Black interiors on the Jazz and Jazz Select

● Blue Black interiors on the Jazz X

Why should only the people in the front have all the fun? The new Honda Jazz comes with reclining rear seats*. Which basically means that no matter where you sit, you can stretch your legs out. On those impromptu long drives.

* In Jazz Select and Jazz X variants.

Keep your eyes on the road and your hands upon the wheel while you enjoy your favourite music on its integrated audio system with auxillary in and USB port.

Steering mounted audio controls to let you tap drive

Amber colored stereoscopic dials that provide all the information you want including instant fuel consumption

PLAY IN A COCKPIT.

Imagine having everything within reach. Your audio controls. Petrol consumption. Seat adjuster. Windows. The Jazz is extremely spacious and yet, everything is within an arm's length. The sporty cockpit is ergonomically designed so that everything is within reach. So sit back. Relax. Because your world will literally be in your hands.

• PLAY SAFE

Remember the knee pads that your mother used to make you wear? And the concerned warnings before you went out to cycle? Thing is, one thing that is essential when playing, is safety.

The Honda Jazz comes with category defining safety equipment. The G-CON body reduces the impact in the event of a crash and crumple zones ensure pedestrian safety. The dual front SRS airbags cushion out a collision and the EBD distributes the brake force among all four wheels based on the load on each wheel. At our Honda crash test facilities, all these features are rigorously tested through endless crash tests.

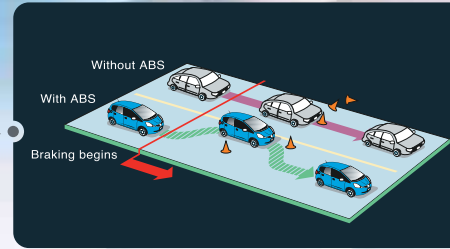

All so while you play, you play safe.

Dual SRS Airbags to ensure your safety

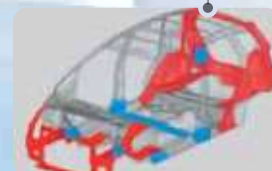

Pretensioner seat belt with load limiter

ABS with Brake Assist to help you steer during hard braking

The Jazz goes through the most stringent tests at the Honda crash test facility

G-CON technology disperses and absorbs collision impact

Large vent windows for better visibility

LIVING THE DREAM

The power of dreams.

The dream of giving joy.

The dream of creating roads without accidents, a cleaner planet for ourselves and our children and technology that doesn't cost the earth.

The results.

Our G - CON technology that provides a safer driving experience.

The FCX Clarity - the world's first dedicated platform hydrogen vehicle.

The revolutionary i-VTEC engine that couples incredible power with great fuel efficiency.

Innovations like ASIMO, the FCX Clarity and HondaJet that push mobility beyond the realms of the conventional.

That help us inch towards realizing dreams.

That's the philosophy that drives us here at Honda.

ASIMO

The most advanced humanoid robot.

The HondaJet

Taking Honda's innovative spirit to the skies.

FCX Clarity

A car with zero emission.
