

CR-Z

VISION

IMPOSSIBLE

Soichiro Honda believed in dreams.

The former car repair apprentice built the first Honda vehicle in 1948.
It was a simple two-stroke motorcycle.

But it was born of a creative force that sparks passion, ignites
revolutionary ideas and connects us to others who share the same vision.

Honda dreamed of winning races all over the world. He made this happen too.

We only have one future, and it will be made of our dreams, if we have the
courage to challenge convention, he said.

Today we're still **dreaming**.

The CR-Z might have been a different car.

The development team were asked to develop a hybrid from an existing model.

But they didn't.

Instead, they asked a question, **'What's the true meaning of driving pleasure?'**

And the answer that came back was simple:

Fun. Because that's what sportiness is all about.

Protecting the environment is important, so is economy.

But what if we could also deliver a thrilling drive?

What if we could make apparent opposites work together?

It seemed like an impossible dream.

But Honda is a company built on dreams

HYBRID HAS

A NEW HERO

ABLE TO STOP TIME

WITH A SINGLE GLANCE

For heroes, the look is everything.

And with this car, when you get in you stand out.

Our mission was to create a tightly packed, lean, efficient shape, exuding strength with an arresting presence.

With soft concave and convex curves flowing in one organic movement from the wide, low-slung front, all the way along the roof, past the shark fin antenna, to the rear.

The CR-Z is everything we know about design.

Sharp, yet elegant, and dangerously tactile, with serious stopping power.

THE POWER TO FLY

WHILE STANDING STILL

FORTRESS OF SOLITUDE

UNLESS YOU HAVE FRIENDS

Every hero needs a special place.

An arctic fortress say, or maybe a cave.

The CR-Z is more sociable, a lot more comfortable, and frankly, way more fun.

This is not so much a cabin as a cockpit.

The feeling of being perfectly held in place within the sporty bucket seats gives a sense of command and control.

The dashboard has a two-level design, with a dark upper portion appearing to float above a lighter lower section, giving a lithe, airy feel.

The intuitive switchgear is arranged around the driver, leaving every control close to hand.

Then there's the sculpted steering wheel, the aluminium and leather gearshift knob, and the sports alloy foot pedals; all engineered for responsiveness and lightness of touch.

Still need to be somewhere else?

Hit the engine start button and let's go.

Accessories Include:

- Illuminated speaker ring and door pocket illumination kit
- Carbon inspired interior panels not available in Ireland

THE INSIDE

TELLS ITS OWN STORY

The CR-Z is many things.

It's a hybrid that delivers outstanding fuel economy and real ecological benefits.

But it's impressively sporty too. All made possible because of a unique combination of technologies.

Honda's unique Integrated Motor Assist (IMA) hybrid system has been twinned with a powerful 1.5 i-VTEC engine for the first time.

Both perfectly tuned to a responsive manual six-speed gearbox, another first for a hybrid.

The result is performance more akin to vehicles powered by much larger engines, yet with much more torque in low gears for easy city driving.

Add a short, wide muscular body shape with a low centre of gravity and class-defining aerodynamics.

Then something wonderful happens.

Driver and machine become one.

And that's the fun part.

ZERO TO HERO

IN UNDER 10 SECONDS

Sport Mode

Normal Mode

The CR-Z's new 3-mode Drive System is designed to let you choose from a trinity of personalities at the press of a button.

Sport mode unleashes the full performance potential of the hybrid powertrain for spirited driving.

Smooth, high rev performance combined with the instant torque-power from the Integrated Motor Assist (IMA) delivers the ultimate driving feel. It adjusts the IMA system for extra boost, the steering feeling and the throttle response for an even more thrilling drive.

And because it's balanced with fuel efficiency, it's a truly modern expression of sportiness.

WHY HAVE ONE ALTER EGO

WHEN YOU CAN HAVE THREE

Econ Mode

Normal mode delivers the best balance between economy and performance. For zipping around the city, it has an agile, assured drive feel.

Pressing the **Econ mode** button switches the system to its maximum fuel efficiency. It decreases the throttle response and increases the support of the IMA system to reduce petrol consumption. All settings, including the air conditioning control, are switched to save fuel and Econ can be selected as the default mode.

Each mode has an intelligent lighting effect.

When in Sport the instrument illuminations are red.

In Normal or Econ, they're blue. Then, depending on how fuel efficiently you drive, the dial will start to glow green. A Shift Indicator Light (SIL) will tell you when to shift up or down to achieve maximum fuel efficiency.

In any of the three driving modes you will be given an ECO score at the end of each journey. This is then added to your lifetime score.

The better your score, the less harmful you've been to the planet and the more money you've saved on fuel.

One body with three identities; you just have to decide which one you're going to be.

Sometimes it's hard being a hero.

THE DYNAMIC DUO

PERFORMANCE AND SAFETY

Engine Features

The source of the CR-Z's power lies in its 1.5 litre i-VTEC petrol engine, teamed with Honda's Integrated Motor Assist (IMA) electric hybrid technology.

The IMA system includes a 10kW electric motor for extra acceleration, which also acts as a generator during braking or coasting by restoring energy in the 100V hybrid battery pack.

Together they unleash 124 ps and an impressive 174 Nm of torque.

And with 6-speed manual transmission, the end result is fuel economy of 6.1l/100km in the city and 4.4l/100km on the motorway and CO₂ emissions of 117g/km.

Efficiency, economy and excitement all under one bonnet.

Who said green should be grey?

Safety Features

Vehicle Stability Assist (VSA) helps to stop skidding by reducing engine power or applying braking to an individual wheel to regain control when slip is detected.

ABS stops the wheels locking up under heavy braking allowing the driver to maintain steering control.

A close-up, high-contrast photograph of a Honda IMA (Integrated Motor Assist) engine cover. The cover is black with a white rectangular label in the center. The label features the word "HONDA" in large, bold, white capital letters. Below it, the words "INTEGRATED MOTOR ASSIST" are written in smaller, blue, sans-serif capital letters. To the right of this text, the letters "IMA" are displayed in a large, stylized, blue font with a white outline. The engine cover has a ribbed texture and is surrounded by various mechanical components, including hoses and wiring, which are partially visible in the background.

IMA

MORE FEATURES

THAN A FULLY LOADED UTILITY BELT

Sometimes you don't want to travel incognito.

The CR-Z is fitted with Daytime Running Lights (DRL) that switch on automatically when you start the engine.

A thin, continuous ray of light emits from a string of LEDs integrated into the bottom of the headlight unit resulting in a great futuristic look and even greater road presence.

Then at night, the CR-Z's powerful High Intensity Discharge headlights* take over, so you can see and always be seen.

HEIGHTENED SENSES

FOR THOSE WHO WANT TO BE SEEN

The audio system though, is all about being heard.

Premium audio power, capable of boosting maximum output to 360w with greater response and impact, comes through six speakers and a subwoofer with a bass that travels deep.

It has an integrated USB connector so you can easily enjoy your MP3 on the go, with controls at centre of the dash as well as remotely on the steering wheel.

And just like the main instrument cluster, switches are illuminated in crystal blue for improved standout.

01

02

03

01 Stereo CD Tuner with MP3
Player Auxiliary Jack
02 Subwoofer

03 Ambient Footwell Lighting

The CR-Z is every bit as practical as it is stylish.

Its shape is all about sporty aerodynamics with a tight, ground hugging frame and wide wheel track for a go-kart driving feel.

Its interior however, has enough space to make two golf bags, a pram, or even a mountain bike conveniently disappear.

How can something be so compact on the outside, yet epic on the inside?

It's a paradox, but it works.

Accessories Include:

- Sports Grille
- Air Intake Garnish
- 17" Alloys
- Front Skirt
- Side Skirt
- Door Mirror Covers
- Tailgate Spoiler

ONE WORLD

DIFFERENT DIMENSIONS

Not all heroes are the same.

Fortunately the CR-Z comes with a comprehensive range of Genuine Accessories to personalise and enhance the new coupe.

From the carbon inspired body kit to the elegant interior blue light accents, each accessory has been crafted to complement the advanced design.

An array of stylish accessories that fit like a glove.

Please refer to your local Honda dealer for full accessory listings.
