

# 2012

# Pilot

# Get away from it all in the vehicle that has it all.

**THIS IS THE HONDA PILOT.** It's more spacious than most. It's more impressive than ever. It's got adventure for eight written all over it. And it's been recharged for 2012. A sophisticated new exterior design with improved aerodynamics is complemented by upgraded interior features and enhanced engine performance, providing incredible fuel economy. You can bank on the Variable Cylinder Management® (VCM®) system to take you on the longest of hauls, while the standard integrated trailer hitch means you're ready to tow. Its MacPherson strut front with multi-link rear suspension makes it handle with car-like precision and rock-like stability, while its smart, storage-wise versatility allows you to pack more into your Pilot than you can into a single weekend. This is the 2012 Honda Pilot. This is going to be fun.

# Escape civilization with sophistication.

**THIS IS PILOT STYLE.** As bold as it is beautiful and as rugged as it is refined, the Pilot doesn't just stand out – it breaks free. Newly refined for 2012, its sophisticated exterior features beveled aerodynamic lines and available body-coloured heated folding power side mirrors with integrated turn signals. And with 18" alloy wheels now standard, you're ready to roll from off the road right back on. Take one look and it's easy to see the Pilot was designed to offer you the best of many worlds in one stylish SUV.

# Weekends need heroes.

**THIS IS PILOT CAPABILITY.** What makes the Pilot's available Variable Torque Management™ 4-wheel drive system (VTM-4®) unique? It's simple. Unlike some systems that only engage when the wheels actually slip, the VTM-4 system anticipates the need for all-wheel drive and automatically engages the rear wheels whenever the vehicle is accelerating. All you have to do is enjoy the confidence that comes from outstanding traction, stability and control in all kinds of conditions. And what makes the Pilot's Hill Start Assist so great? It's easy. It helps prevent the Pilot from rolling when you switch from the brake to the accelerator pedal while the vehicle is stopped on an incline greater than 10 degrees. And that, combined with its unit-body platform, fully independent suspension and integrated trailer hitch, is where the Pilot with VTM-4 gets its available 4500 lb. (2045 kg) towing capacity.

## THE ANATOMY OF THE AVAILABLE VTM-4® SYSTEM

**Front Differential.** When extra traction isn't needed, all the power is directed to the front differential, enhancing fuel efficiency in daily use.

**Centre Propeller Shaft.** The propeller shaft constantly sends power to the rear differential. But the rear wheels are not engaged until directed by the VTM-4 electronic control unit (ECU).

**Rear Differential.** When added traction is needed, while accelerating or on slippery surfaces, the VTM-4 ECU signals the rear differential to engage, seamlessly transferring power to the rear wheels.

# Pilot your life from the inside out.

Model shown with available Honda Satellite-Linked Navigation System™.

**THIS IS PILOT LUXURY.** More than just a refined, spacious place where elbow space and legroom abound, the Pilot's interior was designed to take the driver's and seven passengers' comfort levels to new heights, lengths and widths. New for 2012, the upgraded instrument panel has cleaner lines, richer textures and a revised button layout to give the cabin an air of modern sophistication, while the available Honda DVD Rear Entertainment System with 9-inch display, Bluetooth® Audio and 10-speaker 5.1 Surround Sound Theatre Mode gives the interior an air of awesome. And for luxury of a more practical nature, the available leather-wrapped shift knob is mounted on the dash to allow room for the extra-large multi-functional centre console storage area.

If it's adventure you're after, you'll find it faster using the Pilot's available Honda Satellite-Linked Navigation System™ with trilingual Voice Recognition and multi-view rear camera\*. Responding to over 800 verbal commands, it can guide you with voice prompts and a moving-map display to your destination. To make every ride more personal, opt for the newly available i-MID. You can upload personal photos as wallpaper background, browse songs in your handheld device's music library, and access Bluetooth® HandsFreeLink™ to stay in the loop no matter how far you go. And when it comes to turning around and heading for home, there's a built-in rearview camera\* that provides you with a clear picture of what's behind before you back up.

\*Does not replace the driver's responsibility to exercise due care while driving.

# Seating for 8. Fun for the whole family.

**FOR THE PERFECT BALANCE OF FORM AND FUNCTION, ALL YOU HAVE TO DO IS TAKE A LOOK INSIDE THE PILOT.** Its form is felt in the available heated front seats and in the driver's seat with available 10-way power adjustment and power lumbar support. Plus, there are three rows of very form-fitting seats: two front bucket seats and two rows of three-person bench seats. Function-wise, the newly standard tri-zone climate control system allows passengers to choose their own temperature level, not to mention their own level of comfort. The theatre-style design of the second- and third-row seats offers excellent sightlines, plenty of legroom and easy access. So whether you're into form or function, you'll experience both perfectly in a Pilot.

- > Standard tri-zone automatic climate control with air-filtration system and an available household 110-volt power outlet helps keep passengers comfortable and connected to devices such as laptops or game consoles.
- > An available 10-speaker, 650-watt AM/FM/CD/MP3/WMA/Hard Disk Drive (HDD) 15GB Memory Premium audio system with subwoofer and 5.1 Surround Sound Theatre Mode.
- > The available Honda DVD Rear Entertainment System with 9-inch display, integrated remote control and wireless headsets with personal DTS Surround Sound lets rear passengers pick their own audio or video. A perk the whole family will enjoy.
- > In the event of window fogging, the Pilot's humidity control system compensates before fogging even occurs by automatically activating the heat/defrost mode, adjusting the fan settings and turning the air conditioning on or off.
- > Even when the third row is in use, the rear storage well offers 71 litres of unique storage area, large enough for a medium-sized cooler, a collapsed baby stroller or a set of golf clubs.

It fits your life like a glove.

**THIS IS PILOT VERSATILITY.** What makes the Pilot perfect for almost any size family outing?

For starters, it has an available power tailgate for easy loading and flip-up tailgate glass for quick cargo access. But it also has a 60/40 split-folding second-row seat and a 60/40 split-folding third-row bench seat, so it can go from comfort zone to cargo carrier in seconds. And there's a massive amount of storage in the centre console and 71 litres of cargo space in the rear storage well. Plus, the Pilot can flat-carry items up to four feet wide without tilting or scratching surfaces.

# With great power comes great efficiency.

**THIS IS PILOT PERFORMANCE.** This is the highest fuel economy available in a three-row, 8-passenger SUV. But there's more to the Pilot than incredible fuel-efficiency, it also knows when you need 250 horses of power and when you don't. That's the innovative thinking behind its Variable Cylinder Management® (VCM®) system. To help further increase the fuel efficiency of the Pilot's 3.5-litre, i-VTEC® V6 engine, the VCM system can operate on three, four or all six cylinders. It's performance built to suit the way you live and the way you drive.

Depending on whether you're accelerating, cruising or idling, the VCM system intuitively activates or deactivates the operating cylinders. When you need maximum horsepower, the engine operates on all six cylinders. When you need moderate horsepower, the engine

can operate on four. And when horsepower isn't required, the system can operate on three cylinders. The result: 250 hp and 253 lb.-ft. of torque for towing or passing and increased fuel efficiency when cruising or idling.

Plus, the Pilot's 5-speed automatic transmission has been engineered to enhance fuel efficiency even more, with features such as extra-wide gear ratios for good low-end response and comfortable highway cruising and Honda's Grade Logic Control technology that's designed to hold the vehicle in a lower gear for improved hill climbing or descending performance.

# This is Pilot protection.

**SAFETY FOR EVERYONE** is Honda's commitment to providing one of the highest levels of standard safety features to help ensure occupant safety and protection. And through real-world research, Honda is also focusing on developing unequalled measures of protection to enhance the safety of occupants in other vehicles and even pedestrians – an innovative idea that is quickly becoming a reality.

**Solid Frame Structure.** Like all Honda trucks, the Pilot is built with a rigid unit-body frame for added strength, stability and vehicle handling.

**ACE™ Body Structure.** The highly innovative Advanced Compatibility Engineering™ (ACE) body structure disperses frontal impact energy, increasing occupant protection. Additionally, the ACE frame design allows for collision compatibility between vehicles of different weights and sizes.

**Six Standard Airbags.** Six airbags line the vehicle's cabin, including the revolutionary passenger-side Occupant Position Detection System (OPDS) airbag that will not deploy if the system detects a smaller-sized or out-of-position occupant.

**LATCH.** Standard Lower Anchors and Tethers for Children (LATCH) offer three secure child-seat restraint positions in the second row and one position in the third row.

**Active Front Seat Head Restraints.** Active front seat head restraints lessen the potential for neck injuries during rear-end collisions by reducing the space between the occupant's head and the seat head.

**Anti-lock Brakes.** For safe stopping, the 4-wheel Anti-lock Braking System (ABS) helps you maintain control under hard braking conditions, while Electronic Brake Distribution (EBD) and Brake Assist optimize braking power based on weight distribution inside the vehicle.

**Vehicle Stability Assist with Traction Control.** Vehicle Stability Assist (VSA®) senses and corrects oversteer and understeer to enhance handling and cornering stability, while Traction Control helps ensure grip in slippery conditions.

**Tire Pressure Monitoring System.** For enhanced safety and fuel efficiency, a Tire Pressure Monitoring System (TPMS) continually monitors the air pressure in each tire. If pressure drops in any one tire, an alert appears on the driver's instrument panel.

Honda reminds you and your passengers to always buckle up. Children 12 and under are safest when properly secured in the rear seat.

**THE POWER OF DREAMS, IN ALL THEIR FORMS.** At Honda, we're committed to being a leader in innovative thinking, from the design of our vehicles to the way we work. We have a proud tradition of turning ideas into products and initiatives that help make the world around us a bit brighter and a little more fun. We continually strive to do things others think can't be done, because true innovation comes from daring to dream. Here are just some of the technically ingenious things Honda has brought to life through The Power of Dreams.

- 1> ASIMO™, THE ADVANCED LIFE-ASSISTING ROBOT
- 2> INNOVATIVE PRODUCTS LIKE THE HONDAJET
- 3> OVER 5.3 MILLION VEHICLES ASSEMBLED AT OUR CANADIAN MANUFACTURING FACILITIES
- 4> 10 NORTH AMERICAN HONDA PLANTS ARE SENDING ZERO WASTE TO LANDFILL
- 5> 2,736 TREES SPARED IN CANADA BY PRODUCING DIGITAL BROCHURES
- 6> BLUE SKIES FOR OUR CHILDREN IS HONDA'S ENVIRONMENTAL VISION FOR CANADA AND BEYOND
- 7> 25 YEARS PRODUCING HONDA VEHICLES AT OUR PLANT IN ALLISTON, ONTARIO
- 8> THE HONDA HEAD OFFICE IN MARKHAM, ONTARIO IS CERTIFIED LEED GOLD

**WHEN IT COMES TO ENGINEERING, WE DON'T KNOW WHEN TO STOP.** There's a lot more to Honda than our reliable cars and trucks. As a company founded on dreams, it's no surprise you can find our innovative engineering in everything from motorcycles to ATVs to power equipment and Marine. For almost anything you need to do, there's a Honda that can help you get the job done.

**WE'RE HERE.** At Honda, assistance and support are always available. The team of trained technicians at your Honda dealership will keep your vehicle in terrific shape. Honda accessories installed at the time your vehicle is purchased are covered under the 3-year/60,000-km limited warranty. If you need more information or assistance, call us at 1-888-9-HONDA-9. For all of the latest Honda information, including product specifications, pricing, photos and more, visit [honda.ca](http://honda.ca). It has everything you need to “design” your Honda and personalize it with items from a list of quality accessories.

**Quality Honda Accessories** give you the opportunity to fine-tune your new Honda just how you like it. Whether you want to turn up the style, the versatility or the exclusivity, every accessory is designed and built to adhere to the strictest Honda standards. See your dealer for full details.

**Genuine Honda Replacement Parts** are made to the same exacting standards as original Honda components and are guaranteed by the Genuine Honda Parts Warranty.

**Honda Financial Services.** Whether you buy or lease a Honda, Honda Financial Services can assist you with the process. Ask your dealer which lease or purchase plan best suits your needs.

**We're ready to help.** When you purchase a new Honda, you automatically receive Honda Plus Roadside Assistance. This service is available to you, or anyone else driving your vehicle, 24 hours a day, 7 days a week, anywhere in Canada or the continental U.S. Coverage is for 3 years, unlimited distance and includes towing, battery boosting and lockout assistance plus many other helpful services. Ask your dealer for more information.
