

2013
PILOT

GET AWAY FROM IT ALL IN THE VEHICLE THAT HAS IT ALL.

THIS IS THE HONDA PILOT.

It's more spacious than most. It's more impressive than ever. It's got adventure for eight written all over it. A sophisticated exterior design is complemented by luxurious interior features and engine performance that provides incredible fuel economy. You can bank on the Variable Cylinder Management® (VCM®) system to take you on the longest of hauls, while the standard integrated trailer hitch means you're ready to tow. Its MacPherson strut front and multi-link rear suspension makes it handle with car-like precision and rock-like stability, while smart, storage-wise versatility allows you to pack more into your Pilot than you can into a single weekend. This is the 2013 Honda Pilot. This is going to be fun.

EXTERIOR STYLING

ESCAPE CIVILIZATION WITH SOPHISTICATION.

THIS IS PILOT STYLE.

As bold as it is beautiful and as rugged as it is refined, the Pilot doesn't just stand out – it breaks free. Its sophisticated exterior features beveled aerodynamic lines and available body-coloured heated folding power side mirrors with integrated turn signals. And with 18" aluminum alloy wheels, you're ready to roll from off the road right back on. Take one look and it's easy to see the Pilot was designed to offer you the best of many worlds in one stylish SUV.

INTERIOR STYLING

PILOT YOUR LIFE FROM THE INSIDE OUT.

THIS IS PILOT LUXURY.

More than just a refined, spacious place where elbow space and legroom abound, the Pilot's interior was designed to take comfort to new heights. The available Honda DVD Rear Entertainment System with 9-inch display, Bluetooth® Streaming Audio* and 10-speaker 5.1 Surround Sound Theatre Mode gives the interior an air of awesome. And on a more practical note, the shift knob is mounted on the dash to allow room for the extra-large multi-functional centre console storage area.

If it's adventure you're after, you'll find it faster using the Pilot's available Honda Satellite-Linked Navigation System™ with trilingual Voice Recognition. Responding to over 800 verbal commands, it can guide you with voice prompts and a moving-map display to your destination. To make every ride more personal, you'll appreciate the standard 8" i-MID (intelligent Multi-Information Display). You can upload personal photos as wallpaper background, browse songs in your handheld device's music library, and access Bluetooth® HandsFreeLink™** to stay in the loop no matter how far you go. And when it comes to turning around and heading for home, there's a standard built-in rearview camera** that provides you with a clear picture of what's behind before you back up.

*Only compatible with certain devices.

**Does not replace the driver's responsibility to exercise due care while driving.

PERFORMANCE

WITH GREAT POWER COMES GREAT EFFICIENCY.

THIS IS PILOT PERFORMANCE, THE HIGHEST FUEL ECONOMY AVAILABLE IN AN 8-PASSENGER INTERMEDIATE SUV.

But there's more to the Pilot than incredible fuel-efficiency. It also knows when you need 250 horses and when you don't. Depending on whether you're accelerating, cruising or idling, the Variable Cylinder Management® system intuitively activates or deactivates the operating cylinders to help further increase the fuel efficiency of the Pilot's 3.5-litre, i-VTEC® V6 engine. The VCM® system can operate on three, four or all six cylinders, giving you 250 hp and 253 lb.-ft. of torque available for towing or passing and increasing fuel efficiency for less strenuous activities like cruising or idling. Plus, the Pilot's 5-speed automatic transmission has been engineered with features to enhance fuel efficiency even more. Extra-wide gear ratios provide good low-end response and comfortable highway cruising. And Honda's Grade Logic Control technology was designed to hold the vehicle in a lower gear for improved hill climbing or descending performance.

Accessorized model shown

DRIVETRAIN/TOWING

WEEKENDS NEED HEROES.

THIS IS PILOT CAPABILITY.

What makes the Pilot's available Variable Torque Management™ 4-wheel drive system (VTM-4®) unique? It's simple. Unlike some systems that only engage when the wheels actually slip, the VTM-4 system anticipates the need for all-wheel drive and automatically engages the rear wheels whenever the vehicle is accelerating. Another feature, Hill Start Assist, helps prevent the Pilot from rolling when you switch from brake to accelerator while the vehicle is stopped on an incline greater than ten degrees. These features help you enjoy the confidence that comes from outstanding traction, stability and control in all kinds of conditions. And that, combined with its unit-body platform and integrated trailer hitch, is where the Pilot with VTM-4 gets its 4500 lb. (2045 kg) towing capacity.*

THE ANATOMY OF THE AVAILABLE VTM-4 SYSTEM

FRONT DIFFERENTIAL.

When extra traction isn't needed, all the power is directed to the front differential, enhancing fuel efficiency in daily use.

CENTRE PROPELLER SHAFT.

The propeller shaft constantly sends power to the rear differential. But the rear wheels are not engaged until directed by the VTM-4 electronic control unit (ECU).

REAR DIFFERENTIAL.

When added traction is needed, while accelerating or on slippery surfaces, the VTM-4 ECU signals the rear differential to engage, seamlessly transferring power to the rear wheels.

*See your Owner's Manual for proper towing operation.

SEATING

8 IS MORE THAN ENOUGH.

WHETHER YOU'RE INTO FORM OR FUNCTION, YOU'LL EXPERIENCE BOTH PERFECTLY IN A PILOT.

The form is evident in available heated front seats, the driver's seat with available 10-way power adjustment including power lumbar support, and in the three rows of exceedingly comfortable seats: two front bucket seats and two rows of three-person bench seats. The function appears in the theatre-style design of the second- and third-row seats, offering passengers improved sightlines, increased legroom and easier access.

- › Standard tri-zone automatic climate control with air-filtration system and an available household 115-volt power outlet helps keep passengers comfortable and connected to devices such as laptops or game consoles.
- › An available 10-speaker, 650-watt AM/FM/CD/MP3/WMA/Hard Disk Drive (HDD) 15GB Memory Premium audio system with subwoofer and 5.1 Surround Sound Theatre Mode.
- › The available Honda DVD Rear Entertainment System with 9-inch display, integrated remote control and wireless headsets with personal DTS Surround Sound lets rear passengers pick their own audio or video.
- › The humidity control system compensates before window fogging even occurs by automatically activating the heat/defrost mode, adjusting the fan settings and turning the air conditioning on or off.
- › Even when the third row is in use, the rear storage well offers 79 litres of unique storage area, large enough for a medium-sized cooler, a collapsed baby stroller or a set of golf clubs.

VERSATILITY

IT FITS YOUR LIFE LIKE A GLOVE.

THIS IS PILOT VERSATILITY.

What makes the Pilot perfect for almost any size family outing? For starters, it has an available power tailgate for easy loading and flip-up tailgate glass for quick cargo access. But it also has a 60/40 split-folding second and third-row bench seat, so it can go from comfort zone to cargo carrier in seconds. And there's a massive amount of storage in the centre console and 79 litres of cargo space in the rear storage well. Plus, the Pilot can flat-carry items up to four feet wide without tilting or scratching surfaces.

Honda reminds you to properly secure all items stored in the cargo area.

SAFETY

THIS IS PILOT PROTECTION.

SAFETY FOR EVERYONE.

Honda is committed to providing one of the highest levels of standard safety features to protect driver and passengers. In fact, the Pilot received a coveted 2012 IIHS Top Safety Pick. And through real-world research, Honda is also focusing on developing unequalled measures of protection to enhance the safety of occupants in other vehicles and even pedestrians.

ACE™ BODY STRUCTURE.

The highly innovative Advanced Compatibility Engineering™ (ACE) body structure disperses frontal impact energy to increase occupant protection. Additionally, the ACE frame design allows for collision compatibility between vehicles of different weights and sizes.

SOLID FRAME STRUCTURE.

Like all Honda trucks, the Pilot is built with a rigid unit-body frame for added strength, stability and vehicle handling.

SIX STANDARD AIRBAGS.

Six airbags line the vehicle's cabin, including the front side airbags with the revolutionary passenger-side Occupant Position Detection System (OPDS) that will not deploy the front passenger side airbag if the system detects a smaller-sized or out-of-position occupant.

BRAKING SYSTEM.

For controlled braking, the 4-wheel Anti-lock Braking System (ABS) helps you maintain control under hard braking conditions, while

Electronic Brake-force Distribution (EBD) helps to optimize braking power based on weight distribution inside the vehicle. Brake Assist further improves braking performance by applying full brake pressure when a panic stop is detected.

ACTIVE FRONT SEAT HEAD RESTRAINTS.

Active front seat head restraints help lessen the potential for neck injuries during rear-end collisions by reducing the space between the occupant's head and the head restraint.

LATCH.

Standard Lower Anchors and Tethers for Children (LATCH) offer three secure child-seat restraint positions in the second row and one position in the third row.

VEHICLE STABILITY ASSIST WITH TRACTION CONTROL.

Vehicle Stability Assist (VSA®) senses and corrects oversteer and understeer scenarios to enhance handling and cornering stability, while Traction Control helps to minimize wheel spin when accelerating on loose or slippery surfaces, helping to inspire driver confidence.

TIRE PRESSURE MONITORING SYSTEM.

For enhanced safety and fuel efficiency, TPMS continually monitors the air pressure in each tire. If pressure drops in any one tire, it alerts the driver.

Honda reminds you and your passengers to always buckle up. Children 12 and under are safest when properly secured in the rear seat.

ACCESSORIES

PACKAGES AND KITS

PILOT PROTECTION PACKAGE

- > All-season floor mats
- > Cargo tray

PILOT TOW PACKAGE

- > Trailer hitch towing kit
- > Trailer hitch harness
- > Trailer hitch ball – 1 7/8" or 2"

PILOT REMOTE ENGINE STARTER KIT

- > Remote engine starter base unit
- > Remote engine starter attachment

HONDA i-LINC® KIT

- > Honda i-Linc base unit
- > Honda i-Linc attachment

Accessories listed in the packages may also be added individually to your Pilot.

THE POWER OF DREAMS, IN ALL THEIR FORMS.

AT HONDA, WE'RE COMMITTED TO BEING A LEADER IN INNOVATIVE THINKING, from the design of our vehicles to the way we work. We have a proud tradition of turning ideas into products and initiatives that help make the world around us a bit brighter and a little more fun. We continually strive to do things others think can't be done, because true innovation comes from daring to dream. Here are just some of the technically ingenious things Honda has brought to life through The Power of Dreams.

- 1 THE FUEL-EFFICIENT HONDAJET**
- 2 ASIMO™, THE ADVANCED LIFE-ASSISTING ROBOT**
- 3 LEED® GOLD CERTIFIED MARKHAM HEAD OFFICE**
- 4 MOTORCYCLES WITH RIDER-FOCUSED DESIGN**
