# More space. More versatility. More Civic.

The Civic name has always stood for innovation, for learning from the past and continuing to move forward. Which is why, when we came to design the all-new Tourer, we started from the ground up, assessing every part. Then we did extensive testing, in every driving condition.

The result is a car packed with innovative technology, advanced safety features, dynamic driving characteristics, an unbelievably flexible interior and the largest boot space in its class.

Another Civic that fits your lifestyle.

# Style redefined

*As with every Civic, we wanted the Tourer to stand out from the crowd, and that's just what we've achieved.*

*We've created an aerodynamic family car with a completely unique profile, so you don't have to compromise style for space.*

Model shown is Civic Tourer 1.6 i-DTEC EX Plus in Twilight Blue Metallic. Images are shown for illustration purposes only and show a left hand drive vehicle. In the UK, the Civic Tourer will be a right hand drive vehicle.

# Functional design

At Honda, there's a reason for everything we do. So when it came to styling the Civic Tourer, we looked at it from every angle.

The beautiful sleek floating lines of the roof complement the car's stylish design but also aid the aerodynamics. And redesigning the Civic Tourer with an additional three quarter window not only enhances its profile, but also maximises rear visibility.

The sculpted headlights, hidden door handles and shark-fin antenna were all designed to add style while reducing drag, lowering emissions, and providing a smoother, quieter ride, as with the whole Civic range.

Model shown is Civic Tourer 1.6 i-DTEC EX Plus in Twilight Blue Metallic.

# Class leading space

From lowering the frame to ensure easy loading, to adding convenient extras like the adjustable cargo net and a one-touch tonneau cover, we've made the interior as flexible and practical as life demands.

What you get is a class leading 624 litres of boot space\*, including 117 litres of under-floor storage, and a maximum load area (with the seats down) of 1,668 litres up to roof – enough for every journey.

We've lowered the rear sill and ensured that the tailgate opens high, to take the strain out of loading the boot.

\*624l of boot space including under-floor storage, with rear seat up under tonneau cover.

> Two position cargo net to keep your load secure

>> Even small details like the carpet have been considered. Newly designed to repel dirt, it's now much easier to clean muddy paw prints and muddier boot prints

> The boot houses a 12v accessory socket, providing power perfect for picnics and other outdoor activities

>> The roof rails add to the Civic Tourer's sleek lines and provide the opportunity to easily add a roof rack for carrying bigger loads

> Fold the clever Magic Seats to the floor to make space for just about anything, the options are endless

> Keep your valuables safe with 117l of under-floor storage that's hidden from view

>> The tonneau cover automatically slides back with one touch

Model shown is Civic Tourer 1.6 i-DTEC EX Plus in Twilight Blue Metallic with black leather interior. For more information on what grades these features are available on, please refer to specification pages 43-46.

# Seats that *adapt* to your lifestyle

*Whether it's people, pushbikes or puppies, every car needs space. Which is why we squeezed every inch we could out of the Civic Tourer, to give you class-leading space to suit all your needs.*

*The Civic's innovative Magic Seats fold into a wide range of configurations, so you can create a useful space for any load, be it long, tall or a mixture of both. The seats split 60:40 and fold up or down, creating more space than you might expect.*

*In one simple motion, locking easily into place, you have the ultimate flexible space.*

## Get comfortable

*Life's not always a short trip from A to B. Sometimes you have to go all the way to Z. And with the Civic Tourer you'll get there in comfort as well as style.*

*We've furnished the roomy interior with high-quality materials throughout, giving you a driving environment that is great to look at as well as enjoyable to be in.*

*It's been built around you to enhance your driving experience, with features like the electrically adjustable driver's lumbar and side seat support\*.*

*As you can see, we have your comfort in mind.*

**Driver's lumbar and side seat support adjustment\***

Model shown is Civic Tourer 1.6 i-DTEC EX Plus, manual transmission. Images are shown for illustration purposes only and show a left hand drive vehicle. In the UK, the Civic Tourer will be a right hand drive vehicle.

\*These features are available on the EX Plus grade only.

## Enjoy being the centre of attention

*With the Civic Tourer, we put you at the heart of everything.*

*In designing the cockpit, we have centred the Civic Tourer's multi-functional dashboard around the driver, meaning everything is literally at your fingertips. And by grouping entertainment and driving controls separately around the steering wheel, you get a balanced, easy-to-navigate environment that lets you stay focused on the road ahead.*

Model shown is Civic Tourer 1.6 i-DETEC EX Plus, manual transmission.  
Images are shown for illustration purposes only and show a left hand drive vehicle and kilometres on the i-MID screen. In the UK, the Civic Tourer will be a right hand drive vehicle and will show its speed in miles per hour.

i-MID\*

The Civic Tourer's intelligent-Multi Information Display (i-MID) gives you instant access to vital information on your journey. Fuel economy, cruising distance, average speed and music selection are just some of the features that you can view on your i-MID.

You can even set your favourite picture as the display background.

**Satellite Navigation\***

Built-in HDD Sat Nav makes long journeys effortless, meaning you're always ready for the next adventure.

**High Power Audio Sound System\***

320W MP3 compatible with DAB and tweeters front and rear, giving your Civic Tourer a richer sound system.

**Bluetooth® Hands Free Telephone (HFT)\***

Simply sync your phone via Bluetooth®, and make calls at the touch of a button.\*\*

## All you need, right in front of you

At the centre of the Civic Tourer's intuitive dashboard is the intelligent-Multi Information Display (i-MID). This is where you'll find everything from real time updates on your fuel economy to what's playing on your MP3.

Controlled via the steering wheel and located in the driver's periphery, the i-MID is designed to make driving as safe and convenient as possible by putting all the information you need at your fingertips, so you don't have to take your hands off the wheel or your eyes off the road.

**Rear-view camera\***

Positioned in the tailgate, this option gives you a clear view of what's behind you when reversing.

\*HDD Satellite Navigation is available on SR and EX Plus only. For more information on which grades these features are available on, please refer to specification pages 43-46.  
\*\*For a list of compatible phones, please refer to [www.hondahandsfree.com](http://www.hondahandsfree.com).

## Feel the ride not the road

The Civic's suspension system creates the perfect balance between a comfortable ride and agile handling. The Adaptive Damper System\* allows further customisation wherever the road takes you.

Whether you're going on a long country drive, or taking a shortcut down a cobbled street, the Adaptive Damper System means you simply select the mode that best suits your driving style, speed, load and road surface.

We tested it in some of Europe's harshest and most diverse driving conditions, fine-tuning the system until we were sure you'd be ready for anything.

### NORMAL

Providing a smooth ride and good control, the best setting for most driving conditions.

### COMFORT

With low damping force, this mode provides greater comfort in bumpier road conditions.

### DYNAMIC

Made for those who love a more dynamic driving experience, this setting improves agility to make cornering more controlled.

The settings are displayed on the i-MID\*, while your latest mode is saved so you won't have to reselect when you restart your journey.

The Adaptive Damper System switch is conveniently located in front of the gear stick.

Model shown is Civic Tourer 1.6 i-DTEC EX Plus in Twilight Blue Metallic. Adaptive Damper System is optional on SE Plus and standard on SR and EX Plus. \*For more information on which grades these and other features are available on, please refer to specification pages 43-46.

# Performance you can rely on

*In order to ensure the Civic's engine could stand up to your busy lifestyle, we ran the 1.8 i-VTEC petrol and 1.6 i-DTEC diesel on full power, not for a few hours, but for a few days. That's a lot of miles.*

*Of course, reliability is just one factor. That's why our 1.8 i-VTEC petrol engine was developed to give performance and power in equal measure. Producing 142PS, it allows you to enjoy the thrill of every journey, whether across town or across Europe.*

*Available in manual and automatic 5 speed transmission, our intelligent variable valve system (that's the 'i' in i-VTEC) delivers an advanced driving experience with effortless power and fuel economy, so you can just sit back and enjoy the drive.*

Model shown is Civic Tourer 1.6 i-DTEC EX Plus in Twilight Blue Metallic.

# Driving towards the future

*Developed using our Earth Dreams Technology, the Civic Tourer's i-DTEC engine is specially tuned to ensure the perfect balance of efficiency and performance delivering 120PS with fuel efficiency of up to 74.3mpg\*.*

*By reducing weight and friction, the engine gives a smooth ride with fast response times, but emissions of just 99g/km CO<sub>2</sub>\*.*

*Both the 1.6 i-DTEC and 1.8 i-VTEC come with Ecological Assist (ECO Assist) system to maximise fuel efficiency, and Idle Stop to automatically shut down and restart the engine while in traffic. The ambient meter around the speedometer glows green to reflect smooth, economic driving, and with the manual and automatic transmissions there is a shift indicator light, so you can easily see the best time to change gear and save fuel.*

*So no matter which engine you choose, the Civic Tourer is built with a better future in mind.*

**ECON button**

**Shift indicator light**

\*1.6 i-DTEC manual transmission combined figure for S and SE Plus grades without Adaptive Damper System. For more information on performance, please refer to specification pages 43-46.

#### Airbags

We've installed airbags all round the Civic Tourer, from driver and passenger front airbags to curtain airbags at the sides, to increase the protection from a collision from any angle.

#### Whiplash Lessening Front Headrests

In the event of a rear collision, the headrests move forward with the seats to cushion the impact and help prevent whiplash.

#### ISOFIX Points

In the rear of the car ensure your child safety seats are entirely secure.

#### Headlight Key Off Timer

To help you get to and from the car, the headlights automatically switch on when you unlock the doors, and off 15 seconds after you've locked them.

#### Vehicle Stability Assist

Vehicle Stability Assist constantly monitors the car's grip, regulating power and braking force to give you maximum control.

#### Deflation Warning System

A puncture can happen at any time, so the Deflation Warning System warns you of potential pressure loss in your tyres.

#### Electronic Brakeforce Distribution

The Electronic Brakeforce Distribution system adds control logic to the existing anti-lock braking system, electronically controlling front/rear brake pressure distribution according to front/rear weight distribution. This system delivers braking stability and performance, particularly under heavy load.

#### Emergency Stop Signal

If you have to brake heavily in an emergency, the hazard lights automatically flash to warn other drivers letting you concentrate on what's ahead.

#### Hill Start Assist

This system holds the brakes for you during a hill start, helping prevent roll back and making sure you get away without any problems.

..... Euro NCAP 5 star rating, the maximum available in these independent tests.

## Putting your safety first

Honda's advanced technology has come together to create a Civic that feels safer than ever, as confirmed by our 5 star Euro NCAP rating.

First, we adapted the Civic's Advanced Compatibility Engineering body structure. Built from steel, the Advanced Compatibility Engineering of the frame works by evenly absorbing collision energy before deflecting it away from passengers, whilst simultaneously minimising damage to the other vehicle.

Once we had the body structure in place, we surrounded it with our most advanced safety features to keep your family protected from every angle.

# Advanced technology keeping you safe

When it comes to developing a family car, you can never be too safe.

That's why, in addition to the Civic Tourer's wide range of safety features, you also get the option of two Driver Assistance Safety Packs.

These include our most advanced technologies, like the Lane Departure Warning and City-Brake Active System, monitoring around the car to help you avoid all manner of possible accidents, keeping you, your passengers, and other drivers safer from harm.

## Driver Assistance Safety Pack 1

### Blind Spot Information

Making lane changes and overtaking safer, this Honda-first innovation warns you when vehicles are detected in your blind spot.

### High Beam Support System

The High Beam Support System assesses the driving conditions around you and switches automatically between high and low beam.

### Forward Collision Warning

Should the front camera pick up a car in front, the system warns of a front on collision, allowing you time to take action.

### Traffic Sign Recognition System

Traffic Sign Recognition System can identify traffic signs up to 100m away, and relays this information to the driver via the i-MID as you pass them. Two signs can be displayed at any one time.

### Lane Departure Warning

When road lines are detected and the car deviates from your current lane without indicating, Lane Departure Warning alerts you to the fact with audible and visual warnings.

### Cross Traffic Monitor

When reversing, the Cross Traffic Monitor can detect approaching vehicles from either side and warns the driver of imminent danger. The warning appears on the i-MID.

## City-Brake Active System

1 While driving around town between 3-19mph, to give you the best chance of avoiding a collision, this system can monitor the distance between you and the car in front.

2 If you continue getting closer to a detected vehicle, the Civic Tourer gives you audible and visual warning via the i-MID display.

3 If you've still not reacted, and a collision is imminent, the City-Brake Active System can automatically apply emergency braking to reduce speed as much as possible. In good driving conditions it can even avoid a collision altogether.

## Driver Assistance Safety Pack 2

Pack 2 has the advanced safety technology of Pack 1, (excluding City-Brake Active System) with the addition of Adaptive Cruise Control and Collision Mitigation Braking System.

### Collision Mitigation Braking System

Assisting your braking by automatically applying an appropriate amount of braking force to help you avoid or minimise the chances of hitting a vehicle in front of you.

A radar system in the front grille helps detect when a frontal collision is imminent. First, visual and audible warning is given to the driver. Second, light braking is applied, seatbelt e-pretensioners in the driver's side pull gently a few times to provide a physical warning and then tighten for both passenger and driver. Third, if a collision is still imminent, the system starts forcefully braking and activates the brake assist function, whilst both driver and passenger seatbelts are tightened.

### Adaptive Cruise Control

Whereas Cruise Control only allows you to set your speed, Adaptive Cruise Control uses a radar in the front grille to let you set both speed and distance from the driver in front, making motorway driving easier than ever. Should they slow down, the system automatically adjusts your speed, making sure the distance between you remains the same. Then, when they increase their speed again, the system accelerates to bring you back up to cruising speed.

Models shown are Civic Tourer 1.6 i-DTEC EX Plus in Twilight Blue Metallic and Civic 1.6 i-DTEC EX Plus in White Orchid Pearl.

## > S grade

### 1.8 i-VTEC

Designed to keep your Civic  
Tourer safe and secure.

Electric adjustable  
heated door mirrors

Easy to adjust to your  
perfect angle and quick to  
clear on cold mornings.

# > SE Plus

## 1.8 i-VTEC

6 speed manual transmission  
5 speed automatic transmission

## 1.6 i-DTEC

6 speed manual transmission

**In addition to the features available on the S grade, the features on the SE Plus include:**

17" alloy wheels (1.8 i-VTEC, optional on 1.6 i-DTEC)

16" Aero alloy wheels (1.6 i-DTEC)

Leather steering wheel

Leather shift knob (manual transmission only)

Climate control dual auto A/C

Cruise control with speed limiter

Front and rear parking sensors

Rear one touch power window (up/down)

Remote power window (key fob operation)

Remote retractable door mirrors (key fob operation)

Rear armrest

Passenger seat back pocket

Rear parking camera

Front fog lights

Rain sensing auto wipers

Dusk sensing auto lights

### Optional:

Adaptive Damper System

### Driver Assistance Safety Pack 1\*, including:

City-Brake Active System

Forward Collision Warning

Traffic Sign Recognition System

Lane Departure Warning

Blind Spot Information

Cross Traffic Monitor

Auto dim rear view mirror

High Beam Support System

16" Aero alloys (i-DTEC)

Dual zone air conditioning

Bluetooth® Hands Free (HFT)†

†For a list of compatible phones, please refer to [www.hondahandsfree.com](http://www.hondahandsfree.com)

\*For more information on the Driver Assistance Safety Packs please refer to pages 25-26.

For full specification of this grade please refer to pages 43-46.

Images are shown for illustration purposes only and show a left hand drive vehicle and kilometres on the i-MiD screen. In the UK, the Civic Tourer will be a right hand drive vehicle and will show its speed in miles per hour.

### Rain sensitive wipers

Rain-sensing windscreen wipers activate when moisture is detected on the windscreen and automatically adjust their speed as needed.

### Dusk sensing auto lights

Lights turn on automatically when the light drops significantly.

### Cruise control with speed limiter

Electronic cruise control enables you to maintain a steady cruising speed, reducing the stress of driving long distances.

### Front fog lights

Providing additional light in poor conditions, making driving easier and safer.

### Leather steering wheel

Gives your Civic a luxurious feel.

### Rear parking camera

Situated in the tailgate, this gives you a clear view of what is behind you when you are reversing.

### Parking sensors

Parking sensors at the front and rear make getting into tight spaces easier. A recurring beep becomes more insistent the closer you get to an object.

# > SR

## 1.8 i-VTEC

6 speed manual transmission  
5 speed automatic transmission

## 1.6 i-DTEC

Traffic Sign Recognition System  
Lane Departure Warning  
Blind Spot Information  
Cross Traffic Monitor  
High Beam Support System

Leather seats

Alloy pedals

Silver roof rails

\* Always use the recommended USB flash memory device. Some USB memory devices may not work in this audio unit.

\* For more information on the Driver Assistance Safety Packs please refer to pages 25-26.

For full specification of this grade please refer to pages 43-46.

Images are shown for illustration purposes only and show a left hand drive vehicle and kilometres on the i-MID screen. In the UK, the Civic Tourer will be a right hand drive vehicle and will show its speed in miles per hour.

### Auto dim rear view mirror

Makes for safer driving by automatically dimming the rear view mirror to eliminate glare from the vehicle behind you.

### Heated leather seats

Both the driver and front passenger seats include two-stage heating.

### Silver roof rails

Good looking and practical, much like the Civic Tourer itself.

### Privacy glass

Privacy glass creates a private space and reduces the amount of sunlight entering the rear of your Civic.

### Loading edge cover stainless steel

This smart stainless steel cover protects the bodywork from everyday wear and tear.

### 17" alloy wheels

17" alloy wheels give your Civic Tourer a distinctive and sporty look.

### Adaptive Damper System

A choice of suspension settings, from Normal, Comfort and Dynamic. Allowing you to pick the ride for your conditions.

# > EX Plus

<sup>§</sup>The VDA method is a standardised method of measuring space and capacity.

<sup>†</sup>Fuel consumption, CO<sub>2</sub> and weight figures are measured according to EC directive procedures and are for comparison purposes. As a result of driving behaviour, road, traffic and weather conditions, general state and equipment level of the vehicle, real life fuel consumption and CO<sub>2</sub> figures may differ from these official values. In case of weight (defined as mass in running order), it applies to vehicles with standard equipment. Optional equipment may increase this figure and decrease the payload.

\*Maximum towing weights are based on a 12% gradient and are tested in accordance with EU Regulations. \*\*With Adaptive Damper System and 17" alloy wheels.

A sleek, blue and white HondaJet aircraft is shown in flight, banking upwards against a backdrop of white clouds and a clear blue sky. The aircraft's unique design features a blue nose and cockpit area, with white fuselage and wings. The registration 'N420HW' is visible on the tail, and the 'HondaJet' name is on the side. The engine, mounted over the wing, has a red 'HONDA' logo. The aircraft is angled towards the upper left of the frame.

# Let your imagination take flight

Pursuing our dreams has always been central to what we do. HondaJet was born from the power of these dreams.

We wanted to design a jet that maximises efficiency and performance as well as offering more comfort and space without increasing its size. This led us to break with conventional aerospace thinking and incorporate many unique and revolutionary ideas, like mounting the engines over the wings as opposed to the rear of the fuselage as featured on most business jets.

This may sound a little odd, but in fact it is totally logical, because this layout means the rear of the fuselage no longer has to be designed to house and support the engines, allowing internal space to be maximised.

Because we couldn't find existing engines that fitted our strict criteria for performance and efficiency, we decided to build our own. The result, extremely quiet, lightweight and powerful HF120 turbofan engines. When matched with our 'over the wing technology', they allow faster flight speeds than other aircraft in this class, greater fuel efficiency and significant improvement in aerodynamic performance.

Everything we have learnt developing HondaJet will go into everything else we do, leading us to new innovations, new ideas and new directions. After all, who knows where you could go if you just let your imagination take flight?

Your  
adventure  
starts here
