Nissan Rogue® SL shown in Midnight Jade with optional equipment.

Create some best-in-class envy. Go ahead and demand more. Rogue® delivers, with best-in-class front head room and the supreme comfort of fatigue-reducing zero-gravity front seats! There's a 2nd row that slides and reclines,^{2,3} so you can adjust for maximum leg room, more cargo space, or anywhere in between. And with tasteful touches like standard LED interior lighting and available Power Panoramic Moonroof and double-stitched leather-appointed seats, this is one natural, relaxed, and decidedly upscale environment.

¹Based on Global Automakers of Canada (GAC) segmentation. MY15 Rogue (without moonroof) vs. 2014/2015 compact SUV vehicles (without moonroof) sourced from Autodata on June 6, 2014. ²Slide forward function should not be performed with the Child Restraint System occupied. ³Passengers should not ride in the reclined position while the vehicle is in motion.

YOU'VE GOT AN ALL-ACCESS PASS.

Power Liftgate and 77° Rear Opening Doors. Whether it's kid seats or kayaks, Rogue® gives you easy access with rear doors that swing out nearly 80°, and an available power liftgate that opens with a tap of a liftgate button, your Nissan Intelligent Key®, or a switch located by the driver.

Available 3rd Row. Perfect when you need to transport the team or bring extra friends along. Rogue®'s 50/50 split folding 3rd-row seat gives you added flexibility carrying passengers and their gear, and folds down to make a flat cargo floor for maximum carrying space.

¹Slide forward function should not be performed with the Child Restraint System occupied. ²Cargo shown for display purposes only. Cargo and load capacity limited by weight and distribution. Always secure all cargo. Heavy loading of the vehicle with cargo, especially on the roof, will affect the handling and stability of the vehicle. ³Passengers should not ride in the reclined position while the vehicle is in motion.

MAKING EVERY PART OF YOUR DRIVE BEAUTIFUL.

PURE DRIVE® What if you got excellent fuel economy in a roomy, comfortable crossover that's lots of fun to drive? We got there by developing everything from exterior aerodynamics that whisper through the wind, to an advanced 2.5-litre, 4-cylinder engine, to a virtually gearless Xtronic CVT® transmission that maximizes efficiency and performance. Best of all, Rogue® is just one of a family of PUREDRIVE™ vehicles, reflecting Nissan's commitment to developing more environmentally friendly transportation for all of us.

Eco Mode. Saving made simple. Push the dash-mounted button, and Rogue®'s all-new Eco Mode automatically adjusts to help you maximize fuel economy.

WHETHER IT'S RAIN, SLEET, OR TURN OF ROAD.

Intuitive All-Wheel Drive. It's so responsive, it can adapt to changing conditions 30 times faster than the blink of an eye. Snow, rain-covered pavement or tight turn, the system automatically sends power to the wheels that need it most. Even in ideal conditions, Rogue®'s available AWD pays big dividends – our passionate engineers also tuned the system for responsive, agile performance. Getting a grip has never been more fun.

Confidence-inspiring Dynamic Technologies. Whether it's stop-and-go traffic, your favourite on-ramp, or even just an annoying speed bump, Rogue® uses advanced technology to make every drive feel more comfortable, confident and enjoyable. And that's a beautiful thing.

Active Engine Braking. As you're slowing for a corner or coming to a stop, this system uses the CVT transmission to apply engine braking. Much like shifting to a lower gear in traditional transmissions, it helps give smoother deceleration and a more confident feel when braking.

Active Trace Control. A turn for the better. This innovative technology helps improve control when you take a corner. It reads the cornering situation and, if needed, can brake each wheel individually to help you steer through the turn with confidence.

Active Ride Control. What bump? Active Ride Control smooths them out by automatically applying braking and adjusting engine torque.

NISSAN AROUND VIEW® MONITOR¹

IT'S GOT YOUR BACK. AND THE REST OF YOU, TOO.

What if parallel parking was easier? A rearview monitor is great when backing up – but when it comes to parking, it's nice to see more than just what's behind you. That's why Rogue® offers the available Around View® Monitor.¹ Four cameras give you a virtual 360° bird's-eye view of your vehicle, with selectable split-screen close-ups of the front, rear, and curbside views, so you can get a better look.² And since all obstacles aren't stationary (shopping carts, we're talking to you), Moving Object Detection keeps an eye around your Rogue® and can warn you about moving objects detected in your vicinity.¹

¹AVM with MOD cannot completely eliminate blind spots and may not detect every object. MOD operates at vehicles speeds below 8 km/h. Always check surroundings before moving vehicle. ²Virtual composite 360° view.

RIGHT ON THE NOSE

In Drive, the display gives you both a front and overhead view, so you can pull all the way into your spot (or garage) – but not too far.

COMPLETE THE PICTURE

Located under your driver's side mirror, this camera helps round out your virtual 360° bird's-eye view, whether you're in Drive or Reverse.²

SPARE YOUR WHEELS

In Drive or Reverse, you can push the camera button to switch out the overhead for a side view. A great help for seeing how close you are to the curb.

NO MORE BUMPER CARS

In Reverse, the display helps you see what's directly behind you, while the overhead view helps with shorter objects otherwise hidden below your window.

NISSAN SAFETY SHIELD® PHILOSOPHY

SURROUND YOURSELF WITH CONFIDENCE.

Wouldn't it be cool if you had the confidence you need for every part of your drive? The Nissan Safety Shield® is a comprehensive approach to safety that guides the engineering and development of every vehicle we make.

6 Standard Airbags. When a collision is unavoidable, Nissan's Zone Body construction helps absorb the impact while the advanced seat belt and air bag systems help protect passengers.¹

Tire Pressure Monitoring System. When your tire pressure is low, an icon illuminates on your dash to let you know. When filling your tires, the Easy-Fill Tire Alert gives you a friendly beep of the horn when you've reached the right pressure.^{2,3}

snug4kids® Nissan safety engineers have dedicated thousands of hours to evaluating hundreds of child restraints in Nissans. The result: an industry first, The Snug Kids® Child Safety Seat Fit Guide. This guide lists child seats that fit the rear seats of Nissan vehicles, as well as offers invaluable tips on correct installation. Look for the latest Fit Guide at Nissan.ca/owners/en.

Forward Collision Warning.

Whether it's rapidly slowing traffic ahead, or someone making a surprise merge into your lane, you can get caught off guard in a potentially dangerous situation. How about a little help? With available Forward Collision Warning, a sensor on the front of Rogue® constantly monitors the vehicles ahead in your lane and, when the system detects a potential risk, gives you an audible warning and a visual signal on the instrument panel.⁴

Blind Spot Warning.

If the available Blind Spot Warning system detects another vehicle in your blind spot area, an indicator appears in the driver's or front passenger's doors and on the Advanced Drive-Assist® Display. Put your turn signal on, and the indicator flashes with a warning chime to alert you.^{5,6}

Lane Departure Warning.

If Rogue® detects that you're straying from your lane, the available Lane Departure Warning system will give both a visual and audible alert. The system is so smart, it's designed to stop the warnings whenever your turn signal is engaged.⁷

Moving Object Detection.

When the available Around View® Monitor is in use and detects something moving by the vehicle, it gives a visual and audible alert.⁸

¹Airbags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, in addition to any other requirement of applicable law, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Airbags will only inflate in certain accidents; see your Owner's Manual for more details. Inflated airbags shown for illustration purposes only, actual coverage area may differ. Airbags deflate after deployment. ²TPMS is not a substitute for regular tire pressure checks. ³Vehicle must be on for Easy-Fill Tire Alert to operate. ⁴FCW is intended to warn you before a collision occurs; it cannot prevent a collision. Speed and other limitations apply. See Owner's Manual for details. ⁵Blind Spot Warning is not a substitute for proper lane change procedures. The system will not prevent contact with other vehicles or accidents. It may not detect every vehicle or object around you. ⁶Driving is serious business and requires your full attention. If you have to use the feature while driving, exercise extreme caution at all times so full attention may be given to vehicle operation. ⁷LDW operates only when the lane markings are clearly visible. Speed limitations apply. See Owner's Manual for details. ⁸AVM with MOD cannot completely eliminate blind spots and may not detect every object. MOD operates at vehicle speeds below 8 km/h. Always check surroundings before moving vehicle.

Actual mileage may vary with driving conditions – use for comparison only. IMPORTANT: Starting with 2015 model year vehicles, the Government of Canada has mandated new fuel economy test methods to better approximate typical driving conditions and styles. These new 5-cycle test methods are more representative of a vehicle's on road fuel consumption compared to the previous 2-cycle testing methodology, and can produce fuel consumption ratings that are up to 20 percent higher than the previous ratings. Fuel Economy estimates for the Nissan 2015 model year vehicles may seem less favourable compared to previous years and some competing vehicles that have not yet reported based on new testing criteria. 2015 vehicles do not consume more fuel than the comparable 2014 vehicle under the same driving conditions. Nissan's environmental action plan focuses on several key areas. Increasing production of Zero Emission vehicles, including the 100% electric LEAF®. Improving fuel efficiency through our PUREDRIVE™ measures. And reducing the environmental impact of manufacturing through energy-efficient practices in our plants around the world.
